# VICTOR NDORIA

Nairobi, Kenya | Ndoriavictor4@gmail.com | linkedin.com/in/victor-ndoria

## Professional Summary

Software developer and BSc Software Development / IT student (KCA University, graduating November 2026) with hands-on experience in full-stack web development, backend services and database design. Builds with Java, Spring Boot, PHP, JavaScript and MySQL, and uses Python and Jupyter notebooks for data exploration and analysis. Experienced in debugging, code review, testing, REST API design and technical documentation, with a foundation in data structures and algorithms. Writes clear documentation and explains technical decisions in plain language.

## Technical Skills

- **Languages:** Java (Core & OOP), PHP, JavaScript, Python, C++, SQL, HTML5/CSS3
- **Frameworks & Servers:** Spring Boot, Spring Data JPA, REST APIs, Bootstrap, Apache Tomcat
- **Databases:** MySQL (schema design, query optimization, administration)
- **Data:** Python, Jupyter Notebooks, pandas, data cleaning and exploratory analysis
- **Tools:** Git/GitHub, Maven, Apache NetBeans, VS Code, MySQL Workbench
- **Practices:** MVC architecture, debugging, code review, user acceptance testing (UAT), technical documentation

## Professional Experience

**Tonisoft IT Services** | Nairobi, Kenya

*Technical Systems & Software Attaché* | June 2026 – August 2026

- Developed, tested and deployed full-stack web features and backend database services using PHP, JavaScript and MySQL.
- Configured local staging environments with Apache Tomcat and web servers for database connections, API testing and deployment verification.
- Designed and administered MySQL schemas with attention to query performance, data integrity and secure access.

- Debugged logic errors, took part in code reviews and wrote reproducible bug reports for the engineering team.
- Wrote architecture documentation, API flow logs and user guides to support team operations.
- Trained non-technical users on platform navigation and data entry standards.

## Projects

**Java & Spring Boot REST Services** | Software Developer (Academic & Portfolio Project)

- Built RESTful services in Java and Spring Boot using a clean MVC structure.
- Managed dependencies and builds with Maven in Apache NetBeans, and used Apache Tomcat as the embedded servlet container for HTTP routing and request handling.
- Designed the persistence layer linking the application to MySQL through Spring Data JPA.

**Multi-Tenant SaaS Invoice Generator & Alert System** | Lead Architect (Portfolio Project)

- Designed a multi-tenant invoice engine with HTML-to-PDF rendering and custom client branding templates.
- Built cron-based notification scripts that send email and SMS alerts for due and overdue invoices.

**Java Desktop & Database Application** | Lead Developer (Portfolio Project)

- Developed a Java desktop system applying inheritance, encapsulation and polymorphism.
- Connected the Java front end to a MySQL back end with input validation and transaction handling.

**Task & Workflow Management System** | Independent Developer

- Built a web-based task tool with user authentication, status tracking and CRUD operations.
- Wrote setup documentation and system logs to support maintainability.

**Event Planning Platform** | Lead Systems Developer

- Built application logic in PHP and JavaScript for scheduling and vendor management, with a responsive interface.

**House Prices Analysis (Ames, Iowa)** | Kaggle Public Dataset

- Explored the dataset in Python using Jupyter notebooks, cleaned missing values and inconsistent categories, and documented each step so the analysis could be rerun and reviewed.

## Education

**Bachelor of Science in Software Development / IT**, KCA University | Expected Graduation: November 2026

- Relevant coursework: Object-Oriented Programming in Java, Java Enterprise Architecture, Database Systems (MySQL), Data Structures & Algorithms, Web Application Architecture, Programming for Data Science

**Kenya Certificate of Secondary Education (KCSE)**, Utumishi Academy | 2016 – 2020

## Languages

- **English:** Advanced
- **Swahili:** Native
- **Chinese:** Intermediate
